

NOTE REVIEW WORKSHEET

Use after class to strengthen understanding, identify questions, and prepare more effectively for exams

Step 1: Review & Complete Your Notes

Review your notes while the material is fresh. Add missing details, clarify confusing parts, and organize your notes for future review. Ask, “*What information do I need to add or clarify?*”

Step 2: Identify the Big Ideas

The main ideas from today's class were:

- 1.
- 2.
- 3.

Step 3: Make Connections

Learning improves when you connect new information to what you already know. Ask, “*How does today's material connect to previous topics, readings, or real-world examples?*”

Step 4: Check Your Understanding

Test your understanding by explaining concepts in your own words, creating practice questions, or teaching the material to someone else.

One thing I can explain confidently is:

One concept I still need to practice or review is:

Step 5: Plan Your Next Action

Use your notes to identify what you should do next. This may include reviewing a concept, practicing problems, asking a question in class, attending office hours, or seeking additional support.
